Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 4-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Packwood et al. (US 6,959,356), herein after referred to as Packwood et al. '356.

Referring to **claim 4**, Packwood et al. '356 teaches, as claimed, a method for parametering a process automation technology field device connected with a fieldbus (i.e.-method for communicating field devices connected with a field bus, col. 4, lines 10-15), comprising the steps of: providing a second field device connected with the fieldbus (i.e.-Field bus compatible devices, col. 5, lines 3-5); and providing an on-site operating means, which exchanges parametering data via the fieldbus with the first field device to be parametered (i.e.-hand-held communicator for locally configuring the multi-protocol field devices, col. 2, lines 48-50).

As to **claim 5**, Packwood et al. '356 teaches the method as claimed in claim 4, further comprising the step of: exchanging the parametering data in a proprietary protocol, which is built on top of a fieldbus protocol (HART, PROFIBUS, FOUNDATION FIELDBUS) (col. 3, lines 5-14).

Art Unit: 2184

As to **claim 6**, Packwood et al. '356 teaches the method as claimed in claim 4, further comprising the step of: exchanging the parametering data in a fieldbus protocol (HART, PROFIBUS, FOUNDATION FIELDBUS) (col. 3, lines 14-29).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Kostadinov (US 2003/0056043) discloses multi-protocol bus device;
- Eryurek et al. (US 2002/0022894) discloses enhanced Field bus device alerts in a process control system; and
- Krivoshein (6,449,715) discloses process control configuration system for use with Profibus device network.
